132 Scouring Pad

Technical Data Sheet Applicable To:

132-S972-P01	Metal Detectable Scouring Pads (Blue)
--------------	---------------------------------------

Industry Usage:

These blue metal detectable scouring pads are highly visible and contain iron particles which can be detected in conventional end of line metal detectors, making them ideal for use in the food industry

Features and Benefits:

- Metal Detectable
- Durable long lasting abrasive scrub pad to withstand harsh food processing environments
- Blue only
- Size: 225 x 150 x 9mm (8 7/8 x 5 7/8 x 3/8")
- Material: Metal Detectable Nylon 66

Applications:

- Kettles
- Breeding & Mixing equipment
- Conveyor belts
- Grinders
- Fryers

- Freezer belts

- Ovens

*Detectamet recommends all products be tested in your environment to ascertain suitability and detection levels as this will vary in individual environments

Metal Detection Details:

- Detection limits for a particular machine depend on a variety of factors including line speed, contaminant placement and orientation, iron fortification (i.e. flour). Wet mode vs. dry mode, fragment size, aperture size, etc. It is the responsibility of the end-user to determine the detection limits of the appropriate DETEX component for the individual line set up and for the particular food product being inspected
- Metal and X-ray detection limits for plastic components (above) are based on whole components. Partial plastic and scouring pad components may not be detectable due to detector limitations, partial component size, malfunctioning equipment and/or the type of food product undergoing processing. Scouring pad not X-ray detectable
- Detectamet recommends that all components be tested prior to implementation (separately and included in the processed food product) and/or consult your specific metal detector equipment manufacturer directly.
- Detectamet is not responsible for failure to detect components due to detector limitations and/or detector malfunctions. Refer to the metal detector manufacturer's design limitations, instructions, and warnings regarding the use, limitations, and proper maintenance of the equipment.

No warranty is given or implied with respect to this information or patent infringement. Detectamet Ltd do not accept liability for loss or damage arising from the use of this information. Results are based on a test sample, our general experience and information from suppliers. Data and results may be confirmed by the buyer by testing for its intended conditions of use.
